Preface

HNPS2013 was held on May 30th and June 1st, 2013 in the premises of the University of Athens. HNPS2013 is the 22nd in a series of Symposia organized by the Hellenic Nuclear Physics Society. The series has been running almost without interruption since 1990 when the Hellenic Nuclear Physics Society was founded originally. The Hellenic Nuclear Physics Society acts as the official body of Greek scientists working in the field of fundamental Nuclear Physics and related applications.

During the Symposia, the latest research activities by the members of the Society and guests are presented; future collaborations are discussed; policies are drawn; and young scientists are given the opportunity to show their research to a broader audience and develop their careers. The theematics of the Symposia span a wide range, from fundamental physics problems to applications of Nuclear Physics in other disciplines, in both theory and experiment.

HNPS2013 was hosted in the University of Athens under the aegis of the School of Science Office of the Dean, the Faculty of Physics and the Faculty of Chemistry. The Organizing Committee are particularly grateful to all sponsors for their financial and technical support, as well as the provision of facilities and services that resulted in a successful organization. The assistance and volunteering work of a few undergraduate students is greatly acknowledged (E.-M. Asimakopoulou, A. Kanellakopoulos, V. Lagaki, and E. Malami).

The present Volume contains full papers and abstracts of 34 oral and 22 poster contributions presented during the Symposium. The papers were prepared and submitted by the authors and have been edited solely for typographical errors and formatting, where needed.
