## **PREFACE**

This book includes the main papers presented at the 5th Panhellenic Symposium on Nuclear Physics, held in the University of Patras from 6 to 7 May 1994.

The presented papers belong to five topics: Quantum, Algebra, Nuclear Physics, including Clusters, Nuclear Materials and Thermonuclear Fusion.

The Local Organizing Committee wishes to thank the Rector of the University of Patras, Prof. Likourgiotis and the Chairman of the Engineering Science Department, Prof. V. V. Markellos for the financial support and for the disposal of the facilities of his Department. Financial support to the participating Post-graduate Students has been provided by the Hellenic Nuclear Physics Society. Organizational support has been offered to the Local Organizing Committee by the Post-graduate Students A. Kechrinotis and A. Vagenas as well as by Mr. A. Magoulas from the Physics Section.

It is a pleasure for the Organizers to present this book which is published by the European Commission in the collection "Nuclear Science and Technology", and continues the Proceedings series of the Hellenic Nuclear Physics Society.
