PREFACE

This volume contains the Proceedings of the 31st Hellenic Conference on Nuclear Physics, held in the National Technical University of Athens on the 29th and 30th and of September 2023. The texts of the talks and posters are compiled as submitted by the authors.

This conference followed a series of Hellenic Nuclear Physics Conferences that started in 1990 at Thessaloniki and since then, they are yearly held at different Greek academic institutions involving Nuclear Physics. The aim of this series of conferences is to offer the local nuclear physics community the opportunity to present and discuss their latest activities in theoretical and experimental nuclear physics and applications, sometimes in collaboration with colleagues from abroad and with the use of local facilities along with facilities around the world. It is also a unique forum for presentations by young colleagues, in the early stages of their careers.

The conference was organized under the auspices of the National Technical University of Athens (NTUA). Grateful thanks are due to all the authorities of NTUA and particularly to the School of Applied Mathematics and Physical Sciences and the Rector for the financial support, the technical assistance and the facilities provided for the successful organization of the conference. The help during the conference by several graduate and undergraduate students (Lampros Amanatidis, Sotirios Chasapoglou, Aggelos Dimitriadis, Kalliopi Kaperoni, Anna Karakaxi, Nikolaos Kyritsis, Rafail Kourgiantakis, Despina Lazaraki, Zoi Mpari, Anna Skouloudaki, Ioannis Tsormpatzoglou, Anastasia Ziagkova) is also warmly appreciated.
