PREFACE

This volume contains the Proceedings of the 32nd Hellenic Conference on Nuclear Physics, held in the Aristotle University of Thessaloniki on the 27th and 28th and of September 2024. The texts of the talks and posters are compiled as submitted by the authors.

This conference followed a series of Hellenic Nuclear Physics Conferences that started in 1990 at Thessaloniki and since then, they are yearly held at different Greek academic institutions involving Nuclear Physics. The aim of this series of conferences is to offer the local nuclear physics community the opportunity to present and discuss their latest activities in theoretical and experimental nuclear physics and applications, sometimes in collaboration with colleagues from abroad and with the use of local facilities along with facilities around the world. It is also a unique forum for presentations by young colleagues, in the early stages of their careers.

The conference was organized under the auspices of the Physics Department of Faculty of Science of AUTH. Grateful thanks are due to all the authorities of the Faculty of the Science of AUTH and the Rector for the financial support as well as to the Special Account for Research Funds (ELKE) of AUTH for the technical assistance and the facilities provided for the successful organization of the conference. We would especially like to thank Associate Professor Theodoros Mertzimekis for the organization, editing, and completion of these proceedings.
